

# AUC3 (Among Us Communication Control with Chime)

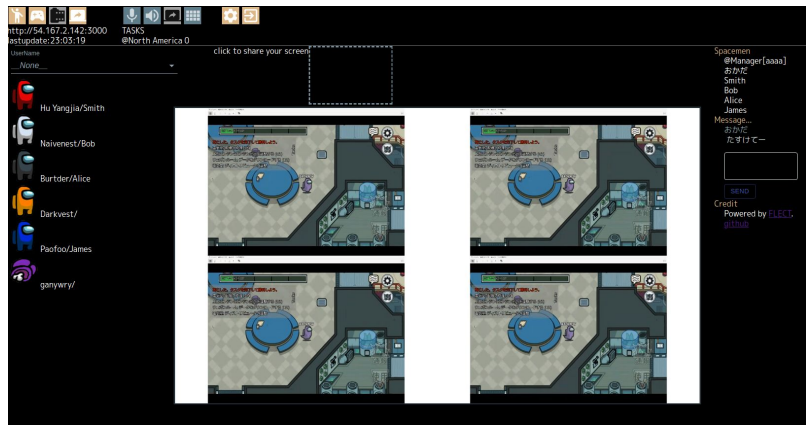

update : 18/June/2021

author : w-okada

repository : <https://github.com/w-okada/flect-chime-sdk-demo>

# AUC3 (Among Us Communication Control with Chime)

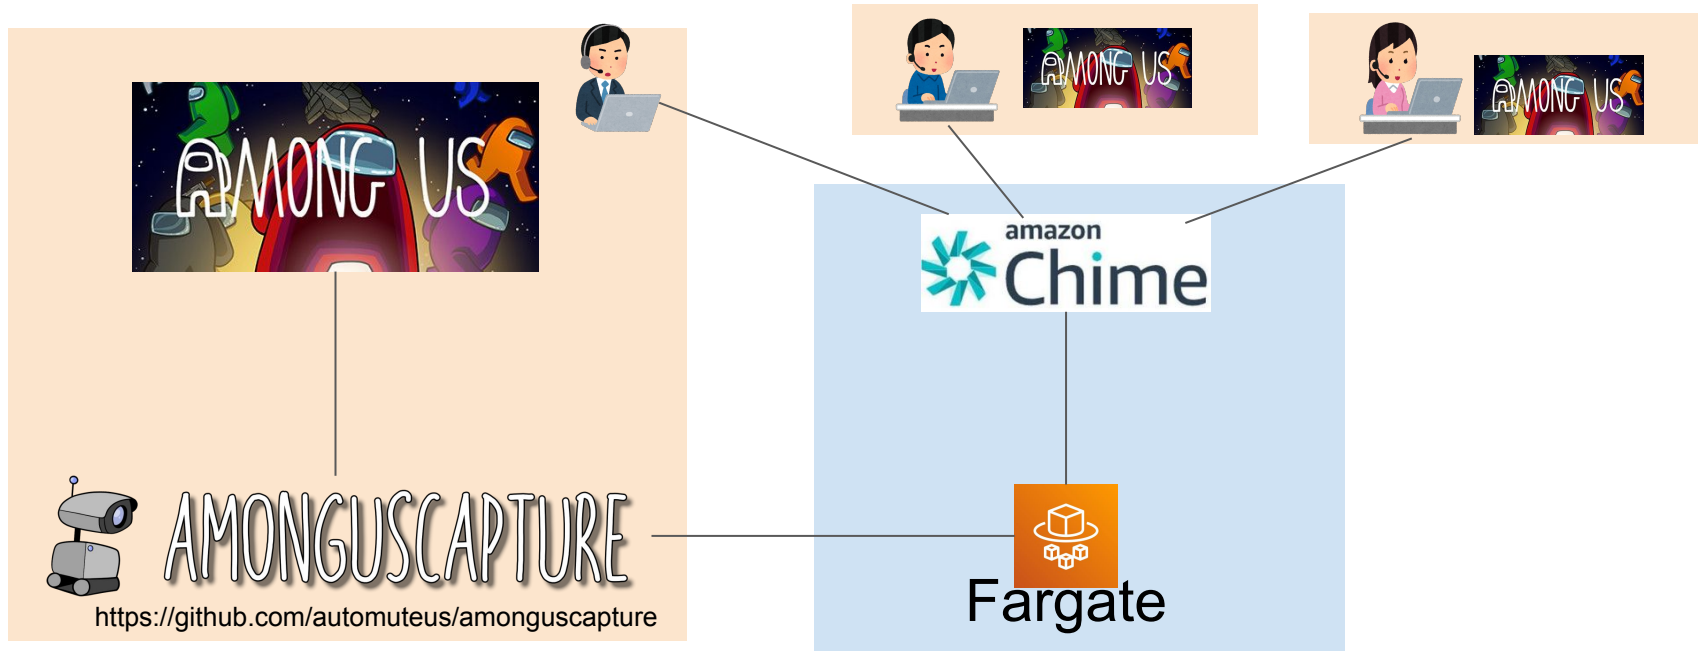

- Control Voice Communication  
Control microphones and a speakers at state.  
(Menu, lobby, task, discussion.)
- Control Sharing Screen  
Show each user's screen in multi vision.  
Control show or hide it at state.
- Serverless  
Backend is deployed to AWS.  
(Amazon Chime, Lambda, Fargate, Cognito, DynamoDB)

- \* Only chrome on linux is tested.
- \* This feature is experimental. Please use with your own risk.

# Architecture Overview

- AUC3 works with Amongus Capture

# Control Voice Communication

- In 'Task' state, players(alive) can not talk to each other.
- In 'Discussion' state, only players(alive) can talk to each other.

*fig. State transition and voice communication control (dashed area can talk each other)*

# Control Sharing Screen

- Players can share the screen and audience can see it.
- Players(dead) can also see the screen.

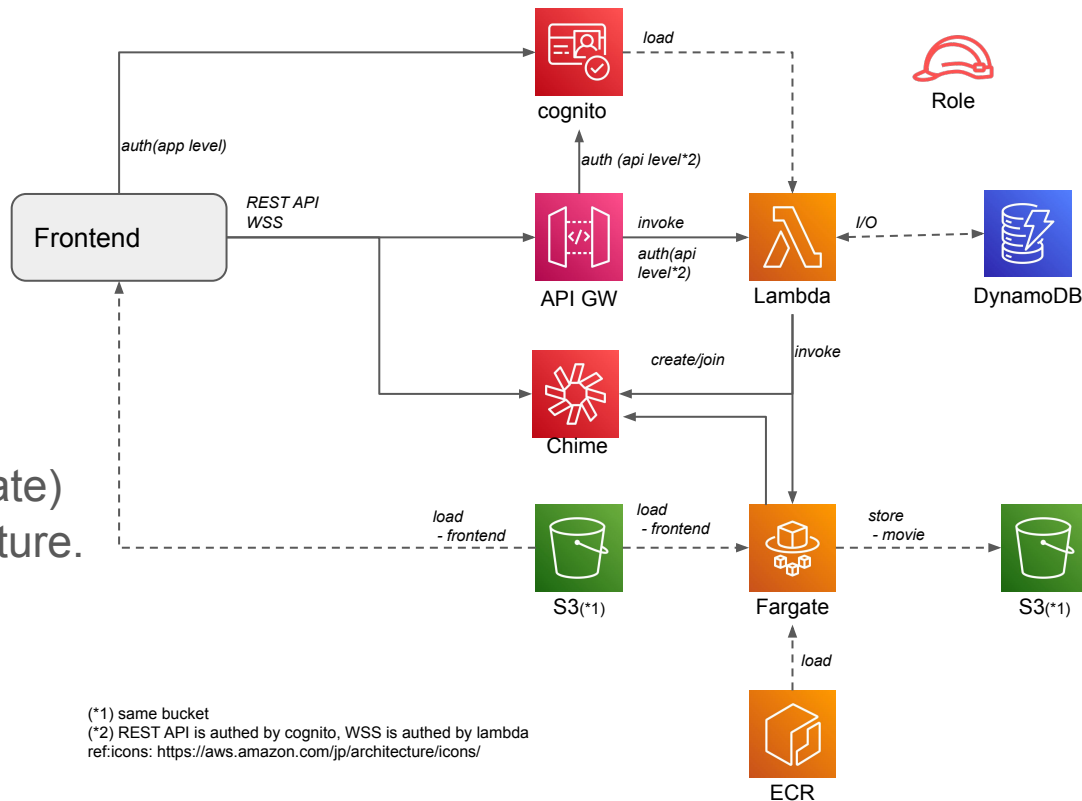

*fig. State transition and screen share control  
(blue dashed area can share the screen, red dashed area can see it)*

# Serverless

- Backend is deployed to AWS.  
No need to manage them.  
(You need to pay for AWS.  
Not so high.)

\* Note: please check your ECS(fargate) task has stopped after using this feature.

Manual

# Change mode

- Change mode by clicking bottom images.
  - (a) Normal Meeting Mode, (b) AmongUs Mode
